Before the FEDERAL COMMUNICATIONS COMMISSION

Washington, D.C. 20554

In the matter of: LightSquared Subsidiary LLC Request for Modification of Its Authority for an

Ancillary Terrestrial Component

To: The Federal Communications Commission

Re: FCC File Number: SAT-MOD-2010111800239

I strongly believe that LightSquared's entry into the broadband marketplace is a positive development,

especially for anyone who cares about innovation and competition. That is why I strongly urge the

approval of its request for modification for an "Ancillary Terrestrial Component."

As the FCC has pointed out, LightSquared's 4G-LTE network will empower cellular providers and others

to compete head-to-head with the big mobile telecom companies that have failed to innovate and

invest to keep up with growing data demands. LightSquared's network will deliver more choices and

lower prices for consumers, leading to more jobs for Americans who need them. Too many Americans

currently lack broadband connectivity, mainly due to its cost. Greater competition and more affordable

service will bring us closer to achieving universal broadband access in America.

I believe the Commission strongly supports these goals, which is why I feel their application should be

supported.

Respectfully submitted,
